

ENTERPRISE BROADCAST & UNLIMITED MEDIA MASTER SYNCHRONIZATION TREATY

Licensors:	Sonabite Platform Network
License Tier:	Broadcast Lifetime Pass (\$1000.00 Enterprise Variant)
Permitted Scope:	Full Media Integration, Linear Television, Theatrical Film, & Unlimited Ads
Distribution Limit:	Absolute / Unlimited Reach (No Audience or Impression Caps)
Indemnification:	Comprehensive Extended Platform Guarantee Policy

This Enterprise Broadcast & Unlimited Media Master Synchronization Treaty ("Treaty") serves as the highest legal clearing instrument executed by Sonabite ("Licensor"). It grants the purchasing corporate agency, studio production entity, or enterprise media buyer ("Licensee") unrestricted global synchronization capabilities across all linear, traditional, digital, and emergent electronic communications media.

1. COMPLETE GLOBAL LICENSE AUTHORIZATION

In consideration of the completed enterprise payment of \$1000.00 USD, Licensor grants Licensee a permanent, irrevocable, non-exclusive, transferable to single final corporate destination client, worldwide, fully paid-up master license. Licensee is empowered to adapt, mix, clip, edit, looping-extend, and permanently synchronize any catalog tracking download across an infinite array of visual or interactive media properties without incurring performance royalties, mechanical collection assessments, or secondary cue sheet requirements.

2. AUTHORIZED UNLIMITED DEPLOYMENTS (WHAT YOU CAN DO)

This tier represents a true legal master-clearance vehicle. Permitted uses include, but are entirely unrestricted to:

- **Linear Television & Satellite Broadcasts:** Full synchronization within national, regional, or localized TV programming, broadcast network series, cable channel features, syndicate content blocks, and premium subscription video-on-demand architectures (e.g., Netflix, Hulu, Prime Video).
- **Theatrical Distribution & Cinema:** Integration within feature films, independent studio short subjects, documentary entries, trailers, and public cinematic exhibition runs globally.
- **Massive National Ad Campaigns:** Deployment across high-tier paid advertisement runs, including nationwide TV commercials, digital pre-roll sequences with programmatic spend allocations, digital billboards, and public venue interactive screens.
- **Video Game & Interactive Environments:** Commercial distribution within desktop software releases, console gaming systems, mobile application titles, and virtual reality sound design structures.

ABSOLUTE REACH SECURITY: There are **zero viewing metrics caps, zero impressions tracking tables, and zero regional performance territorial exclusions** tied to this instrument. Your tracking clearance metrics are clear in perpetuity.

3. FINAL RESIDUAL PROHIBITIONS (WHAT YOU CANNOT DO)

Despite the comprehensive flexibility of this document, the following absolute intellectual constraints remain active:

1. **No Raw Re-Distribution or Re-Packaging:** Licensee cannot upload raw audio tracks into audio libraries, sound effects portals, standalone template frameworks, or compete directly against Sonabite as an un-synchronized music broker.
2. **No Sub-Licensing for Third-Party Marketplace Re-sale:** Licensee cannot include the audio within an atomic template designed for a mass-sale commercial theme store (e.g., WordPress themes or video templates where the raw audio is accessible to secondary buyers).

4. FULL LEGAL INDEMNIFICATION STRUCTURE

Licensor warrants and maintains complete, absolute corporate accountability that all compositions available under this profile are legally cleared, structurally unique, and totally free from un-notated sampling or third-party copyright claims. Licensor provides a premium corporate extended protection and legal defense guarantee structure backstopped up to an industry-standard ceiling of \$5,000.00 USD per verified track dispute to resolve any systemic digital or linear copyright disputes immediately.
