

Licensors:	Sonabite Platform Network
License Tier:	Commercial Lifetime Pass (\$500.00 Variant)
Permitted Scope:	Commercial Digital Media, Corporate Brand Assets, and Monetized Streams
Audience Caps:	Maximum 1,000,000 Views Per Content Assembly Group
Territory:	Worldwide / Global Execution

This Commercial Digital Music Synchronization Master License ("License") is a legally binding contract between Sonabite ("Licensor") and the authenticated purchaser of the Commercial Lifetime Pass ("Licensee"). This document grants extensive transactional, legal, and operational rights to embed Sonabite audio assets into highly commercialized, professional digital media layouts across global networks.

1. OPERATIONAL GRANT & SCOPE

Subject to a single, authenticated one-time settlement fee of \$500.00 USD, Licensor grants Licensee a perpetual, non-exclusive, world-wide, fully paid-up license to synchronize, execute, alter, and embed Audio Content downloaded during active account windows into commercial digital properties intended for client distribution, platform monetization, or brand recognition operations.

2. PERMITTED COMMERCIAL DEPLOYMENTS (WHAT YOU CAN DO)

Licensee is granted legal authorization to execute transactions across the following standard business paths:

- **Full Monetized Content Production:** Deployment inside monetized YouTube videos, Facebook video nodes, Twitch streams, and podcast networks with active advertising contracts, affiliate links, or direct programmatic payouts.
- **Corporate & Brand Content:** Creation of commercial promotional videos, product explainers, employee training materials, digital recruitment campaigns, and corporate identity videos hosted on commercial websites or business social accounts.
- **Sponsorships & Client Contracts:** Execution of professional video editing jobs for third-party freelance clients, small businesses, and brands, transferring synchronized clearance parameters directly to the client's localized distribution layer.

VOLUME AND VIEW LIMITATION: This tier grants clean digital coverage for up to **1,000,000 individual web impressions/views** per video assembly group. Projects projecting or crossing the 1,000,000 view threshold require an escalation transition to the Broadcast Lifetime Pass.

3. ABSOLUTE CONTRACTUAL RESTRAINTS (WHAT YOU CANNOT DO)

The operational freedom of this Commercial License remains strictly bound by the following negative covenants:

1. **No Broadcast or Traditional Media Distribution:** Licensee is strictly prohibited from deploying Audio Content in over-the-air television network programming, terrestrial or satellite radio channels, cable TV streaming networks, theatrical releases, or traditional linear cinema runs.
2. **No Reselling or Standalone Asset Flipping:** Licensee cannot bundle, unpack, resell, or distribute audio tracks as standalone sound elements, backing loops, stock website assets, sample packs, or sound effects within competitive creator systems.
3. **No Ownership Alterations:** Licensee explicitly acknowledges that all intellectual property rights remain with Sonabite. Licensee may not submit tracks to audio fingerprinting networks or file copyright claims that limit other Sonabite customers from accessing the catalog.

4. WARRANTY CLEARANCES & INDEMNIFICATION LIMIT

Licensor certifies that the source audio compositions were legitimately generated under premium algorithmic structures owned or exclusively cleared for commerce by the operator. Licensor provides a complete commercial safe-use indemnification policy up to an aggregate cap of \$500.00 USD to resolve any documented technical claim disputes regarding baseline asset source clearance.
